

# GOKUL GOPAN

Kerala, India — +91 9072239489 — [gokulmittu01@gmail.com](mailto:gokulmittu01@gmail.com)  
[LinkedIn](https://www.linkedin.com/in/gokulgopan01) [github.com/Gokulgopan01](https://github.com/Gokulgopan01) [portfolium-fqcy.vercel.app](https://portfolium-fqcy.vercel.app)

## OBJECTIVE

---

Software Engineer with 3 years of experience building web applications, APIs, and automation tools using Python, Django, Angular, and cloud services. Strong problem-solver with full-stack, DevOps, and machine learning expertise, seeking to contribute to scalable engineering projects.

## SKILLS

---

Languages / Frameworks	Python, JavaScript, HTML, CSS, Django, FastAPI, Angular, Bootstrap, AJAX
Databases	MySQL, PostgreSQL, SQLite
Tools	Git, Jenkins, Selenium, Playwright, BeautifulSoup, Pandas, Requests
Cloud / ML	AWS, Google Cloud, Scikit-learn, Matplotlib

## EXPERIENCE

---

<b>Software Engineer</b> Ecesis Technologies	Mar 2023 – Present Kerala, India
---	-------------------------------------

- Designed scalable software architecture and conducted system design for internal web applications.
- Built REST APIs with FastAPI and led API development to integrate services.
- Implemented CI/CD pipelines with Jenkins and adopted DevOps practices for seamless deployments.
- **Machine Learning:** Built and deployed ML models for image recognition and historical data-based predictive calculations using Scikit-learn and Pandas.
- **Automation Scripting:** Automated business workflows such as voicemail-to-email conversions and internal data updates using Selenium and Python scripting.

<b>Full Stack Intern</b> One Team Solutions	Sep 2022 – Feb 2023 Kerala, India
--	--------------------------------------

- Developed web applications using Django, MySQL, and Angular.
- Designed responsive user interfaces using Angular, HTML, CSS, AJAX, and JavaScript.

## PROJECTS

---

**Pet Safe (2025)** — <https://github.com/Gokulgopan01/Pet-Safe>

Platform for pet owners to securely manage and share pet details. Built user profiles, health record uploads, AI Doctor Assistant using Gemini AI. Designed scalable microservices architecture to support QR-enabled keychains. Focused on UX and cross-platform development. **Tech: Django, Angular, MySQL.**

**Work Track (2024)** — <https://github.com/Gokulgopan01/Work-Track>

Role-based dashboard for employee task management. Implemented task CRUD, role-based access control, and progress charts. Applied agile methodologies to deliver features on time. **Tech: Django, Angular, MySQL, MatSnackBar, SweetAlert.**

## EDUCATION

---

<b>Diploma in Computer Engineering</b> , Government Polytechnic College Neyyattinkara Thiruvananthapuram, India	2019 – 2022
--	-------------

## LEADERSHIP & EXTRA-CURRICULAR

---

- Mentored peers and collaborated with cross-functional teams in agile development environments.
- Contributed to open-source projects and automation scripts shared with developer communities.
